

## TECHNICAL INFORMATION OF SPRING RIDERS IN POLYETHYLENE

**Model:** Tube cod. 9008

**TECHNICAL DETAILS:** Suitable for children from 0 to 12 years  
Weight Kgs. 67,80

**CERTIFICATION:** The spring rider has been designed and manufactured in compliance with EN 1176-1:2017 EN1176-6:2017 regulations and certified by TÜV- RHEINLAND.

**DETAILED DESCRIPTION OF EACH COMPONENT:**

- Figures of the spring rider made of polyethylene PE-HD manufactured with a tubular rotation in bulk-colouring, of high density and completely recyclable.
- The accessories such as hands and feet grips are entirely made of polyethylene PE-HD and their surface is non-slip to permit a better grip.
- The spring group with 20 mm wire is certified by the SPRING-DISK safety anchoring system
- The "U" bracket made of steel with 5 mm of thickness and painted with painting for outdoor and fixed to the spring-disk permits the perfect conjunction between the spring group and the figure.
- The ground fastening support consists of a strong structure in hot galvanized steel that grants a high resistance against corrosion. The support is put into the ground and fixed to the spring disks to grant a perfect anchorage of the entire structure.
- All fittings are made of stainless and galvanized steel

**SPARE PARTS:** All the component parts of the spring rider are available as spare parts. Damaged components have to be replaced only with original spare parts.

**INFORMATION:** The spring rider has to be put into the ground as by Fig. (outdoor) or put into its own round removable base (indoor).

**MAINTENANCE:** It is suggested to check the spring riders as by EN1176-1:2017 EN1176-6:2017
