TECHNICAL INFORMATION OF SANDBOX IN POLYETHYLENE

Model: Sandbox cod. 9007

Sandbox with PVC cover cod. 9007/C

TECHNICAL DETAILS: Suitable for children from 0 to 12 years

Peso 53,80 Kg

Peso 55,00 Kg con copertura

CERTIFICATION: The spring rider has been designed and manufactured in compliance with EN 1176-1.6:2008 regulations and certified by TÜV- RHEINLAND.

DETAILED DESCRIPTION OF EACH COMPONENT:

- The sides of the sandbox made of polyethylene PE-HD in bulk-colouring, of high density and completely recyclable.
- The accessories such as seats are entirely made of polyethylene PE-HD and their surface is non-slip to permit a better grip.
- The Polyethylene is treated against UV-rays and its light fastness is "8" (scale 1-8)
- I Pali sono profilati in alluminio designati appositamente per la mobilita, particolarità che rende l'altalena molto più robusta. Vengono verniciati con trattamento
- All fittings are made of stainless and galvanized steel

SPARE PARTS: All the component parts of the spring rider are available as spare parts. Damaged components have to be replaced only with original spare parts.

INFORMATION: The spring rider has to be put into the ground as by Fig. (outdoor) or put into its own round removable base (indoor).

MANTEINANCE: It is suggested to check the spring riders as by EN1176-7:2008.
